# Build-out of Internet Exchange Points in the Caribbean Region

Stephen Lee

## Project Objective

***Develop nascent Internet Exchange Points in the Caribbean Region and help them become significant components of their countries' domestic Internet infrastructure***

# Project Overview

Multi-year, multi-country

Bring together the technical community and stakeholders

Provide access to expertise and structured training

Assist with evaluation, design and installation

# Activities

- Consultations with iOrgs in the region

- Discussions within the CaribNOG community
- Research by the CaribNOG Research Unit
- IXP training
- Collaboration with the NSRC
- Work with the St Kitts & Nevis Internet Exchange Point

# Outcomes

- Three capacity-building workshops as part of CaribNOG and CarPIF meetings
- Design and spin-off of a Caribbean IXP Directory project
- Improved collaboration between stakeholders and members of the technical community
- Active work on St Kitts & Nevis IXP
- Restricted in-person activity due to COVID-19

# Thank You!
