Three Topics… beyond the Registry

1. Promoting and enriching an inclusive, bottom-up Internet governance model: Líderes Program + Policy Shapers Initiative

2. R&D Ambassadors Program: collaboration among technological leaders in the community and LACNIC
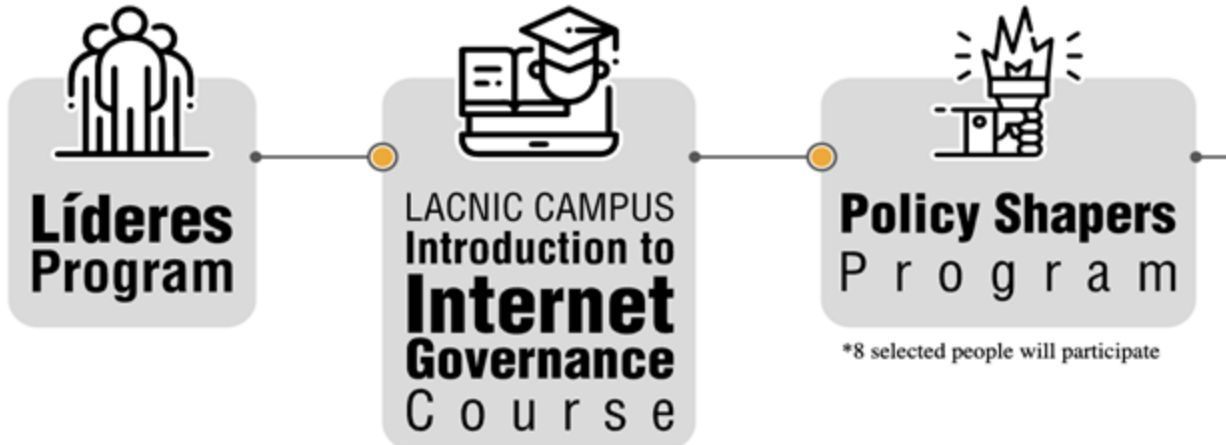

3. LACNIC 41 Panama City

lacnic

Líderes Program

The **Líderes** program aims to provide funding and mentoring selected professionals in the region to research about Internet Governance (IG) issues from the perspective of their own communities.

- 76 applications received in 2023
- Policy Shapers initiative (selected group)

Líderes Program

LACNIC CAMPUS Introduction to Internet Governance Course

Policy Shapers Program

*8 selected people will participate

lacnic

Policy Shapers Initiative

Seeks to attract budding reference people from different sectors to our community and accompany them in their insertion into the world of Internet Gover

Step 1
- LACNIC's first annual event

Step 2
- Inter-American Diploma Course "The Human Right to Privacy and Protection of Personal Data" by the Inter-American Institute of Human Rights (IIDH)
- Diplo Foundation course for English speaking candidates

Step 3
- Internet Governance Diploma, DiGI

R&D Ambassadors Program

id.Ambassadors Program

lacnic

Seeks to formalize collaboration between technological leaders in the community and LACNIC to achieve our strategic objectives for advancing Internet infrastructure development in LAC

The program identifies professionals interested in conducting R&D in alignment with LACNIC's infrastructure development activities.

Benefits: possibility of presenting the results at the LACNIC 43 event, the development of a personal brand, and a budget for the Ambassador's tasks, among others.

Technological capacities to be enhanced with this program include:

1 Deployment of LACNIC anycast DNS servers or DNS root zone servers

2 Deployment of measurement platforms

3 Deployment of BGP collectors at IXPs or other networks of interest

4 Deployment of technologies considered critical by LACNIC: IPv6, RPKI validation, DNS/DNSSEC adoption, etc.

5 Strengthening of local technical capacities: organization of workshops, tutorials, meetings.

6 Promotion of regional research activities
