- I think the proposed fee schedule and reduced allocation minimums is a good idea
- I would like to see some type of 'reservation' policy if ARIN decides to offer allocation below a /20
- multiply by 100 or 10,000 self-important <bleep>s with 2xDSL will blow the routing table.
- This doesn't enable additional routing table bloat, it just centralizes the people who actually do need it so the people who don't can be filtered.
