2002 Board of Trustees Candidates

Board of Trustees Candidates

John Brown

David Conrad

Stephen Stuart

Bill Woodcock

JOHN BROWN

http://www.arin.net/elections/bot/jbrown.html

Motivation: My primary reason is to directly further the bottom up policy making processes that ARIN subscribes to. To ensure that ARIN works within the community and assists in proper global policy development as it pertains to the ARIN community.

- **CEO of Chagres Technologies, a network infrastructure consulting firm, responsible for development and operations.**

- **Prior to co-founding Chagres, was CTO of a rural ISP based in the southwest US.**

- **Active within the North American Network Operators Group (NANOG), hosted two meetings and presented on several topics.**

- **Current research interests include network security, traffic engineering for non-facilities-based carriers, and the management and mitigation of DOS/DDOS attacks.**

STEPHEN STUART

http://www.arin.net/elections/bot/sstuart.html

Motivation: Primarily as an important public service and duty. ARIN is very important to the industry where I make my career, and it's my turn to pitch in and help.

- **VP of engineering at PAIX, the neutral exchange point business of which he was a co-founder in 1996**
- **The Internet Software Consortium's network architect and a member of the team that operates f.root-servers.net.**
- **His background in software and network engineering began at Digital Equipment Corporation. He was the network architect responsible for the AltaVista search site.**
- **A founder and VP of engineering/CTO of MIBH, a backbone outsourcing, transit management provider. Became VP of Research and Development for MFN prior to his return to PAIX.**
