

Number Resource Policy Manual (NRPM) Working Group

Chris Tacit, Working Group Chair

About the Working Group

- The Working Group had some turnover with the departure of Robert Seastrom following his election to the Board of Trustees, and the subsequent addition of Brian Jones, whom we are very happy to welcome.
- Other current members are Matthew Wilder, Kat Hunter and Chris Tacit.
- Eddie Diego supporting us has proven to be very valuable as his Registration Services Department experience is helpful to our work.

What have we been doing?

- Our most recent work focused on Section 2 of the NRPM.
- That work has since translated into some policy proposals, including a few that are editorial in nature.
- Those proposals are currently winding their way through the Policy Development Process.

What are we doing now?

- With the aid of a handy spreadsheet tool prepared by Matthew Wilder, we are reviewing the various provisions in Section 4 of the NRPM.
- Our objective is to identify provisions that should be deleted or clarified.
- Once we have identified all potential changes, we will group them into a sensible number of proposals, some of which may be editorial.

What are we doing now?

- In some cases, staff input is needed to inform our classification and proposed changes
- We work hard to balance the objective of not having too many proposals injected into the PDP at once to avoid an unworkable "omnibus"

Thank You
