- In 2022, we submitted seven policy proposals from the Policy Experience Report

# What we are working on

---

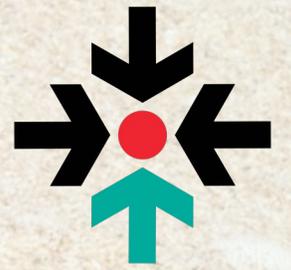

Should IPv4 Waiting List blocks be permanently ineligible for needs-based transfer?

# What we are working on

---

With current IPv4 Waiting List times being in years, should an organization be eligible to receive a small IPv4 block (e.g. /24) via NRPM 8.3/8.4 and stay on the waiting list?

# What we are working on

---

Should organizations be able to immediately lease out IPv4 space obtained from the IPv4 Waiting List?

Thank You
