

Draft Policy 2014-3
Remove 8.2 and 8.3 and 8.4
Minimum IPv4 Block
Size Requirements

Problem Statement

- All three transfer sections make the minimum block size allowed to be transferred a /24. In a post-exhaustion world, policy should allow and enable networks to move blocks around as they see fit, without arbitrary regulation of a minimum size.

Policy Statement

Remove all instances in 8.2, 8.3, and 8.4 which set a minimum transfer size of a /24.

Feedback So Far

- Minimal discussion on list
- Several posts in favor of abandoning
- One person supporting
- One person suggesting that relaxing from /24 possibly as far as /28, but not removing altogether.

Discussion

- Should an organization be allowed to transfer existing blocks without limitations on size?
- Is there improved language or comment you wish to offer?
