

Policy Text

Problem Statement:

The current section 4.10 Dedicated IPv4 block to facilitate IPv6 Deployment creates an issue where a small new organization that requires an IPv4 allocation or assignment would potentially receive a block that today would be unroutable and therefore unusable for its intended purposes.

Policy statement:

Change

"This block will be subject to a minimum size allocation of /28 and a maximum size allocation of /24. ARIN should use sparse allocation when possible within that /10 block."

To

"This block will be subject to an allocation of /24. ARIN should use sparse allocation when possible within that /10 block."
