

# **Recommended Draft Policy**

## **ARIN-2017-12**

*POC Notification and Validation Upon  
Reassignment or Reallocation*

# History

- Proposal - ARIN-prop-247 - 17 October 2017
- Draft Policy - 21 November 2017
- Recommended Draft Policy - 20 March 2018
- Last Call - 23 April 2018
- Moved to Board for Review - 22 May 2018
- Remanded to AC - 16 August 2018
- Moved back to Draft 26 February
- Revised/Recommended - 25 March 2019
- Presented at:
  - ARIN 41
  - ARIN 42

# Staff and Legal Review (28 February 2019)

- Staff Understanding (1/3)
  - NRPM section 3.7 requires that all requests for reallocation or detailed reassignment can only be made to existing organizations in the ARIN database with at least one validated POC object. This is a large change to the way we currently do business. There are several customers that have automated their reallocation/reassignment process with ARIN following the current model.

# Staff and Legal Review (28 February 2019)

- Staff Understanding (2/3)
  - These changes will add some complexity and possibly additional states to automated systems interacting with ARIN for the reallocation/detailed reassignment process.
  - These changes will require customers requesting reallocation or detailed reassignments to gather and verify information from their customers prior to submitting their requests.

# Staff and Legal Review (28 February 2019)

- Staff Understanding (3/3)
  - These changes will provide a higher degree of privacy protection to the organizations that are having reallocations/detailed reassignments submitted on their behalf.
  - ARIN would be required to notify all POCs requiring validation through email notification whether the request is successful or not.

# Staff and Legal Review (28 February 2019)

- Staff Comments
  - Overall these changes will result in more accurate information in the ARIN Whois database.
  - Draft Policy NRPM section 3.7 would not have a direct effect on RSD operations as far as processing the requests for reallocations and detailed reassignments due to the fact that they are automated; however, initially there could be an increase in customer support calls and tickets.
  - This policy could be implemented as written.

# Staff and Legal Review (28 February 2019)

- Legal Assessment
  - No material legal risk in this policy

# Staff and Legal Review (28 February 2019)

- Resource Impact
  - Implementation of this policy would have a large resource impact. It is estimated that it would take about 8 weeks of development work and there will need to be extensive testing performed with the community as well.
  - It is estimated that this policy could be implemented approximately 6 months after ratification by the ARIN Board of Trustees.
    - Updated guidelines and internal procedures
    - Updated documentation on website
    - Staff training
  - Extensive engineering work will be required

# AC Presentation
