VIRTUAL MEETING

Draft Policy ARIN 2020-2

***Grandfathering of Organizations Removed from
Waitlist by Implementation of ARIN-2019-16***

Background

- In February 2019, the ARIN Board suspended issuance of IPv4 resources through the waitlist in light of fraud and misuse.
- The Board referred NRPM section 4.1.8 (*Fulfilling unmet needs*) to the Advisory Council.
- In accordance with section 10.2 (*Policy Suspension*) of the PDP, the Advisory Council recommended an updated waitlist policy. The update was ratified by the Board and implemented on July 10, 2019.

Background

- In order to address misuse, the updated policy added constraints on an organization's eligibility for IPv4 from the waitlist and the subsequent usage of those resources. The policy:
 - limits the size of block ARIN can issue on the waitlist to a /22
 - places a limit on the total existing IP address holdings of a party eligible for the waitlist at a /20 or less
 - makes resources issued from the waitlist ineligible for transfer until after a period of 60 months.

Background

- This resulted in some organizations, that qualified under the previous policy's criteria, being removed from the waiting list.

Old Waitlist Policy	New Waitlist Policy
<ul style="list-style-type: none">• Requester specifies smallest block they'd be willing to accept, equal to or larger than the applicable minimum size specified elsewhere in ARIN policy.	<ul style="list-style-type: none">• limits the size of block ARIN can issue on the waitlist to a /22
<ul style="list-style-type: none">• Did not place a limit on the total existing IP address holdings of a party eligible for the waitlist	<ul style="list-style-type: none">• places a limit on the total existing IP address holdings of a party eligible for the waitlist at a /20 or less
<ul style="list-style-type: none">• made resources issued from the waitlist ineligible for transfer until after a period of 12 months	<ul style="list-style-type: none">• makes resources issued from the waitlist ineligible for transfer until after a period of 60 months.

Problem Statement

- The implementation of the ARIN-2019-16 Advisory Council Recommendation Regarding *NRPM 4.1.8: Unmet Requests* caused some organizations to be removed from the waiting list that were approved under the old policy's eligibility criteria.
- These organizations should have been grandfathered when the waitlist was reopened to allow them to receive an allocation of IPv4 up to the new policy's maximum size constraint of a /22.

Policy Statement (1/2)

- Add section 4.1.8.3 (temporary language in the NRPM to remain until the policy objective is achieved):

Restoring organizations to the waitlist

ARIN will restore organizations that were removed from the waitlist at the adoption of ARIN-2019-16 to their previous position if their total holdings of IPv4 address space amounts to a /18 or less. The maximum size aggregate that a reinstated organization may qualify for is a /22.

Policy Statement (2/2)

- All restored organizations extend their 2 year approval by *[number of months between July 2019 and implementation of new policy]*. Any requests met through a transfer will be considered fulfilled and removed from the waiting list.
- Timetable for Implementation: Immediate

Discussion

- Do you support continuing to work on this proposal?
- Should grandfathered orgs still have a limit placed on their total holdings? The proposal specifies a /18 instead of the /20 currently specified in the NRPM.
- Should grandfathered orgs be eligible for the new limit of a /22, or for their requests based on the previous version of the policy under which they originally qualified?

???

Thank you.

Any Questions?

Discussion
