Pending ACSP Report

Mark Kusters, CTO

ACSP Suggestion 2008.15

- WHOWAS service (submitted June 2008)
- <https://www.arin.net/participate/acsp/suggestions/2008-15.html>
- Answered in two phases
 - 1st phase – requests submitted to hostmaster (functional in Q3 of 2008)
 - 2nd phase - implementation of a Whois-like service by end of 2009

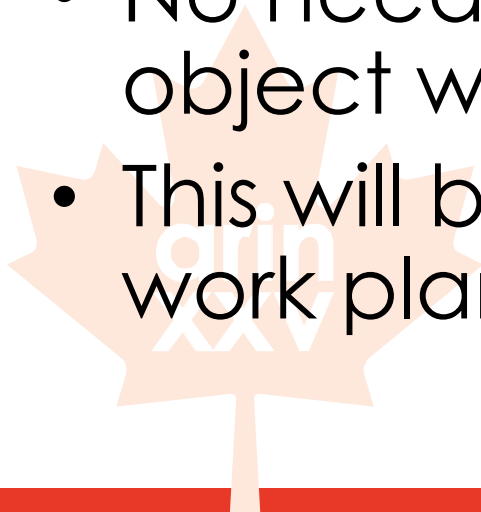

WHOWAS Service Update

- Not updating legacy WHOIS service
- Would be very expensive if it was!
- Will be a feature of ARIN Online

ACSP Suggestion 2008.23

- Simple Version of IPv6 Reassign template (submitted Nov 2008)
- <https://www.arin.net/participate/acsp/suggestions/2008-23.html>
- No need for a separate organization object with simple reassign template
- This will be evaluated and fit into our work plan

Simple IPv6 Reassign Template

- Working on RESTful Provisioning Service
- An IPv6 simple-reassign template will be incorporated
- This makes a lot of sense

ACSP Suggestion 2009.2

- Promote use of IPv6 – show that arin.net can be reached over IPv6 (submitted March 2009)
- <https://www.arin.net/participate/acsp/suggestions/2009-2.html>
- Answered -to be deployed in ARIN Online
- Deployed with no address with Logo

**IP
v6** ENABLED

Promoting IPv6

- Have some CMS/Framework limitations
- Looking into WCAG 2.0 Standards
- May have a more suitable solution

ACSP Suggestion 2009.15

- Speed up timeline for Online POC Validation (submitted Aug 2009)
- <https://www.arin.net/participate/acsp/suggestions/2009-15.html>

POC Validation

- Development is currently underway
- To be deployed by end of Q2 of 2010

ACSP 2008.14

- Construct Validated IRR Data
(Submitted June 2008)
- <https://www.arin.net/participate/acsp/suggestions/2008-14.html>

Validated IRR Data

- Dependent on RPKI
- Will have a production version of RPKI by the end of 2010
- This suggestion will be considered in 2011 following RPKI deployment
