

Draft Policy ARIN-2014-3
Remove 8.2 and 8.3 and 8.4 Minimum
IPv4 Block Size Requirements

- **2014-3 History**

- Origin: ARIN-prop-195 (Jan 2014)
- AC Shepherds: Owen DeLong, Bill Darte
- AC accepted as Draft Policy in January 2014
- Draft Policy text
 - Online & in Discussion Guide
 - https://www.arin.net/policy/proposals/2014_3.html

- **2014-3 – Work in Progress**

- Posted to PPML and presented for community discussion

- Advisory Council needs your feedback:

- Is it good number policy?

- Fair and Impartial?

- Technically Sound?

- Supported by the Community?

- Should the AC continue to work on this or get rid of it?

- **Next: AC presentation**

Problem Statement

- All three transfer sections make the minimum block size allowed to be transferred a /24. In a post-exhaustion world, policy should allow and enable networks to move blocks around as they see fit, without arbitrary regulation of a minimum size.

Policy Statement

Remove all instances in 8.2, 8.3, and 8.4 which set a minimum transfer size of a / 24.

Discussion

- Should an organization be allowed to transfer existing blocks without limitations on size?
- Is there improved language or comment you wish to offer?
